

# Community

**Freidnships  
Relationships**

**A sense of  
belonging**

**Safety and security  
Life skills**

At The Castle School we want our students to:

- Feel safe and secure within the school community, a sense of belonging and a common purpose. Where everyone has a place and a pathway to follow that meets their own individual needs.
- Learn to be part of a school community. To develop relationships with pupils and staff and to encounter trust and friendships. Within this to develop the social skills that develop the firm foundations of communication.
- Develop life long skills for the wider world. To be as independent as possible and to prepare for a place in world once they step out of our door.
- To be enterprising out in the community and show the wider world how ambitious our learners can be.
